

COMPACTORS

HUSQVARNA LT 8005

Art.no: 970 70 31 01

LT 8005 is our heaviest rammer with the widest foot. It is well-balanced and powerful, developed for efficient compaction of granular and cohesive soils such as clay and silt. Ideal for compaction in trenches or other narrow spaces, such as around pillars and pipes. Equipped with a powerful diesel engine, it delivers deep compaction thanks to a combination of high centrifugal force and optimised weight.

FEATURES

High compaction performance

Efficient compaction thanks to a powerful diesel engine attached to a durable gearbox delivering high speed and high impact force.

Great ergonomics

The single lifting point make on-site handling easy. Transport wheel kit available as an accessory.

Easy to manoeuvre

The balanced design provides excellent traction and manoeuvrability. Good visibility of the rammer foot in operation, which enables timely movement.

Operator friendly

The three-position throttle control (idle, full speed, stop/closed) enables ease of operation and also closes the fuel line when in the stop position to prevent leakage. The vibration reduced handle helps to reduce operator fatigue.
